

# Blends

**Mathewson-IGT Knowledge Center**

## Your Creation!

At Interstate® Brick, our wide range of unique colors and sizes, and our pallet of perfectly contrasting clays, provide every job with the most bold or subtle range possible.

And—It's your statement!

## Your Style!

# Blends

Blends are mixtures of two or more brick colors that are combined to create a complimentary range of appealing tones.

At Interstate® Brick, we skillfully blend different colors of brick in varied percentages and package them to control the randomness of the blend.

---

**The Mathewson-IGT Knowledge Center** was completed in 2008 as one of the most technologically advanced libraries in the country.

The \$75.3 million, 295,000-square-foot, five-story building represented the University's most ambitious capital project.

The building was designed with computing and information technologies in mind. Combined with the latest in multimedia tools and the resources, the University library is a physical environment designed for comfort, efficiency and collaboration.

The Brick is central to this theme and to the diversity of the University.
